DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 18-27 are rejected under 35 U. S. C. 102(b) as being anticipated by Blanchard (US Pat. 4,767,722).

Regarding claims 18, 22-25, Blanchard discloses in figs. 3 and 6 a vertical transistor is formed in a trench of a semiconductor substrate and comprises an N⁺-type first doping region 10 being underneath a bottom of the trench; an N⁺-type second doping region 21a/21b being beside a top of the trench; wherein the first and second doping regions functions as bit lines for the non-volatile memory array; a P-type third doping region 20b beside the trench; an N-type fourth doping region 11 beside the trench, and being located lower than the P-type third doping region 20b; a gate dielectric layer 32 having a thickness of about 500-1000 angstroms is formed on the first doping region 10 (col. 4, lines 1-8), the second doping region 21a/21b and a sidewall of the trench, wherein the gate dielectric layer comprises at least one nitride film (col. 4, lines 5-7); and polysilicon plug 33 formed in the trench (col. 4, lines 9-21); wherein the N⁺-type first doping

Art Unit: 2818

region 10 of the vertical transistors are connected as a common plate serving as one of a common source/drain (col. 4, lines 54-60)

Regarding claims 19-21, Chang discloses the semiconductor substrate is constituted of a silicon substrate and a mask layer/oxide layer of about 1000-10,000 angstroms (col. 3, lines 26-30 and fig. 4a-4b).

Regarding claims 26 and 27, Chang discloses the at least one of the vertical transistors further comprises insulation blocks 30/35 formed on the surfaces of the first and second doping regions 10/21a/21b (figs. 5&6 and col. 4, lines 38-45).

Response to Arguments

2. Applicant's arguments with respect to claims 18-27 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on

Art Unit: 2818

the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
